

TECHNICAL TINCTURE of GREEN SOAP

DESCRIPTION:

Technical Tincture of Green Soap is a mild, effective liquid soap solution containing alcohol for general cleaning of medical instruments and utensils and skin washing. Ready to use, Technical Tincture of Green Soap contains glycerin that helps to restore moisture to skin and minimize the effects of drying alcohol. Sanitek uses only natural oil derived from vegetables and coconuts. Soaps made from coconut oil produce the most copious lather of all the animal and vegetable soaps. Technical Tincture of Green Soap contains no animal products, dyes or fillers.

Technical Tincture of Green Soap is a SOLUTION OF SOFT SOAP IN ISOPROPYL ALCOHOL.

Technical Tincture of Green Soap differs from Tincture of Green Soap as described in the United States Pharmacopeia and National Formulary, 14th Edition.

INGREDIENTS:

65% Soap Blend (Coconut & Vegetable-oil based), 35% Isopropanol of 99% strength.

FOR USE IN:

Traditional bulk-fill soap dispensers. May also be used directly from container.

USAGE:

General hand and skin washing and sanitation • Cleaning instruments and utensils.

HEALTH & SAFETY:

CAUTION:
DO NOT TAKE INTERNALLY
HARMFUL IF SWALLOWED

EMERGENCY AND FIRST AID PROCEDURES

INGESTION: Do NOT give liquids if victim is unconscious or very drowsy. Otherwise, give no more than 2 glasses of water and induce vomiting by giving 30cc (2 tablespoons) Syrup of Ipecac. If Ipecac is unavailable, give 2 glasses of water and induce vomiting by touching finger to back of victim's throat. Keep victim's head below hips while vomiting. Get medical attention.
